Manufacturer & Exporters of Manicure/Pedicure (Beauty Care), Instruments

The formation of **Mlintra Beauty Instruments** in 1995 was based upon our determination to win a good name for ourselves and our country by setting a new standard of products and service. We have been working hard to prove the validity of its objective and are proud to manufacture the instruments for Manicure, Pedicure (Beauty Care), in Pakistan.

For customer satisfaction, we manufacture & design all the instruments under ISO-9001: 1994 & ISO-13488:1996 Quality System and also fulfilling all the requirements.

We shall do everything possible to make you a steady customer. We want you to demand more of us than others. We will make good!

We are using top quality Stainless Steel grade to produce our high quality products.

STAINLESS STEEL is considered to be an ideal material for most of the beauty care surgical instruments. However, it remains a clear misconception that it cannot or will not corrode at all. If the instruments are not cleaned thoroughly and dried completely soon after use, the condensation of water or the remains of certain chemicals, like barium and aluminum chlorides, bromine or iodine, will cause spots, stain or pitting.

Washing the instruments with very strong detergents, steel abrasive or brushes can also damage the surface. Dry-heating beyond 160°C may effect their hardness and quick cooling may result into breakage.

Our comprehensive range illustrated in this catalogue and if there is a particular pattern which is not enlisted, please contact us for further requirements.
